

# IMPROVING SECURITY MEASURES ON YOUR EDGE PORTAL

## Introducing Two-Factor Authentication

### What is two-factor authentication and why the change?

*Two-factor authentication adds extra security to your account by requiring a second factor, such as a code sent to a mobile device or email. This helps prevent unauthorized access and protects against security breaches.*

*Your data security is our top priority, and we utilize robust data protection measures to safeguard your information.*

### Instructions

*The next time you use Participant Edge you will be prompted to use a second form of authentication.*

You will be prompted to use two-factor authentication when logging into your EDGE portal, as well as in cases of forgetting or changing your password, and registering.

When registering, you will be prompted to enter your cellphone number and an email to which the two-factor authentication code would be sent.

**To continue, you must enable Two-Factor Authentication.**

**What does this mean?** This means that a unique code will be required to log in from now on. You can choose to receive this code via email or cellphone.

**Please select your preferred mode of contact, and we will send you a authentication code right away. Once received, enter the code generated on your mobile device or browser.**

1

**Reduce Risk of Unauthorized Access**

2

**Added Layer of Security = Peace of Mind**

### When you can expect to be prompted:
